		I statutory period for response to this action is set to expiremonth(s), days from to espond within the period for response will cause the application to become abandoned. 35 U.S.C. 1			
2 art 1 1. 3. 5.		THE FOLLOWING ATTACHMENT(S) ARE PART OF THIS ACTION: Notice of References Cited by Examiner, PTO-892.  Notice of Art Cited by Applicant, PTO-1449  Information on How to Effect Drawing Changes, PTO-1474  Company of the Patent Drawing Changes, PTO-1474  Company of the Patent Drawing Changes, PTO-1474  Company of the Patent Drawing Changes, PTO-1474	, PTO-948. Application, Form PTO-152		
art II		SUMMARY OF ACTION			
1. ]	⋈	Claims 1-14	_ are pending in the application.		
		Of the above, claims	_ are withdrawn from consideration.		
2.		Claims	_ have been cancelled.		
3.		Claims	_ are allowed.		
4.		Claims \ \ - 14	_ are rejected.		
5.		Claims			
6.		Claims are subject to restriction or election requirement.			
7.		This application has been filed with informal drawings which are acceptable for examination purposes until such time as allowable subject			
8.		matter is indicated.  Allowable subject matter having been indicated, formal drawings are required in response to this Office action.			
٠.					
9.		The corrected or substitute drawings have been received on These draw not acceptable (see explanation).	ings are acceptable,		
10.		The proposed drawing correction and/or the proposed additional or substitute sheet(s) of drawings, filed on			
	has (have) been approved by the examiner, disapproved by the examiner (see explanation).				
11.		The proposed drawing correction, filed, has been approved disapproved (see explanation). However, the Patent and Trademark Office no longer makes drawing changes. It is now applicant's responsibility to ensure that the drawings are corrected. Corrections MUST be effected in accordance with the instructions set forth on the attached letter "INFORMATION ON HOW TO EFFECT DRAWING CHANGES", PTO-1474.			
12.		Acknowledgment is made of the claim for priority under 35 U.S.C. 119. The certified copy has been received not been received			
		been filed in parent application, serial no; filed on	·		
13.	<ol> <li>Since this application appears to be in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11; 453 O.G. 213.</li> </ol>				
14.		Other			

Serial Number 542,590 Art Unit 335

1. 35 U.S.C. 101 reads as follows:

"Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title".

Claims 1-9 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-9 of applicant's US Patent No. 4,436,092. This is a double patenting rejection.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

 $\label{eq:Aperson shall be entitled to a patent} % \begin{center} \begin{center$ 

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Csapo.

Serial Number 542,590 Art Unit 335

3. The following is a quotation of 35 U.S.C. 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

claims 12-14 are rejected under 35 U.S.C. 103 as being unpatentable over Csapo. The spatial relationship between the temperature sensor and the stimulus means as well as the use of multi-lumen catheters to implement said sensor and stimulus means would be considered obvious design choice capable of being made by one of ordinaryskill in the art.

Serial Number 542,590 Art Unit 335

4. The additional art cited by the examiner have been included for their teachings in the art of physiologically regulated pace makers.

Any inquiry concerning this communication should be directed to Mitchell J. Shein at telephone number 703-557-3144.
